

Not All Soft Baits Are Created Equal

FASTDRAW®
FastDraw takes 4-5 days to work.

VS.

Don't be fooled by other soft baits. *FastDraw* and *Revolver* soft bait contain 0% wax, and 100% rodenticide in every bite rodents consume

Brodifacoum soft bait contains 5% wax, which can freeze or melt in extreme temperatures

FastDraw pouches are 10 grams, providing you more placements per pail, a lower cost per placement, and less bait waste

Brodifacoum soft bait pouches are larger, which means: fewer placements per pail, higher placement costs, and more bait waste when replacing with fresh bait

FASTDRAW®
Takes 4-5 days to work.
