# The Favored Choice Among Rodents!

**FASTDRAW®**

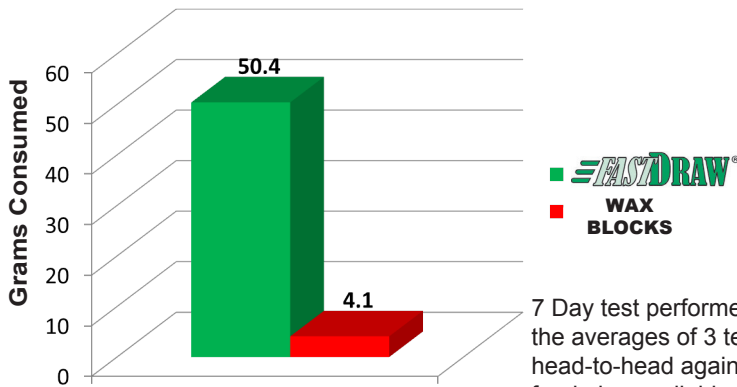

FastDraw takes 4-5 days to work.

VS.

**WAX  
BLOCKS**

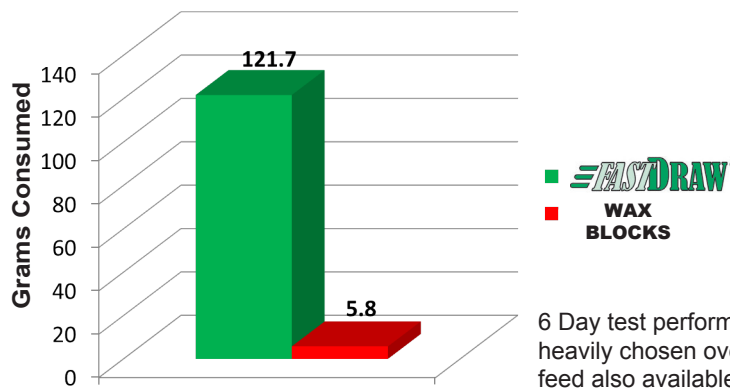

## House Mouse Study

Data is based on a summary of Liphatech field study results.

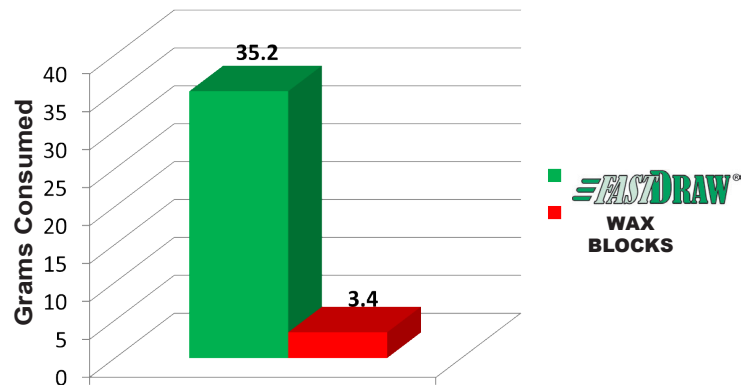

7 Day test performed in a dairy barn, above are the averages of 3 tests. *FastDraw* was compared head-to-head against wax blocks with competing feed also available.

## House Mouse Study

6 Day test performed at a feed mill. *FastDraw* was heavily chosen over wax blocks with competing feed also available.

## Roof Rat Study

Single night test performed on a hog farm. *FastDraw* was compared head-to-head with wax blocks while animal feed was also available.
