

CANNON - THE ONE FOR CLEAN OUTS

8 gram placements

THE WORLDS FIRST BROMETHALIN SOFT BAIT

Simple, effective control - NO MORE MIXING MEAL BAIT & PELLETS!

Outperforms purple wax blocks

No-wax formulation does not melt in high temperatures

Single feed control

Low cost 8 gram placements provide less bait waste

Contains Bromethalin: kills rodents in 24 - 48 hours

Saves money: rodents cease feeding after consuming a lethal dose

Quick-Tips for Clean-out Baiting

- Remove accessible sources of feed from your production building.
- Determine areas of high rodent traffic such as along walls, gnawed openings, in corners, between floors or walls, beside burrows, or locations where signs have been observed.
- Frequently inspect placements and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity.
- Replace contaminated or spoiled bait immediately.
- Continue baiting until all signs of feeding have ceased.
- Always read and follow label directions.
